

CIVIL/SITE ENGINEERING

We understand the relationship between a building and its site.

ABOUT OUR SERVICES

Popli Design Group's (PDG's) civil/site engineers work closely with our clients to efficiently plan and execute projects. Our team has a broad range of experience designing site solutions for educational, commercial, industrial, municipal, and institutional projects. Projects range from simple site repair and improvement projects to complex, multi-acre land developments.

PDG civil engineers are familiar with the unique requirements of sustainable design, LEED, and stormwater management practices. In addition, our familiarity working with municipalities and regulatory agencies helps ensure a smooth transition through the permitting process.

Our experience with a large variety of site projects throughout New York State allows us to provide creative solutions to achieve the vision of our clients.

Capabilities:

Site analysis and selection, site planning and design, municipal site plan reviews, regulatory agency reviews, environmental impact studies (SEQR), storm and sanitary sewers, on-site sanitary treatment systems, water (domestic and fire) services, backflow prevention devices, grading and drainage, culverts, stormwater management facilities, stormwater pollution prevention plans (SWPPP), erosion and sediment control plans, parking lots/pavements, traffic circulation, retaining walls, subdivisions, synthetic running tracks, and athletic facilities.
