

HIGHWAY DESIGN

We design sustainable, cost-effective roads and highways to meet travelers' needs by improving safety and easing congestion.

ABOUT OUR SERVICES

Popli Design Group (PDG) has been providing highway design services for over 25 years. Our diverse project experience includes highway preventative maintenance, rehabilitations, reconstructions, intersection improvements, sidewalk and bicycle improvements, and transportation enhancement projects. Our team of engineers have experience working with local governments and major state transportation agencies.

At PDG, we use a team approach to efficiently plan, progress, and complete projects. Our team works closely with clients to formulate a concise and realistic project schedule from preliminary design through final design. We work with our clients and the community to make every project a success that all of us can be proud of.

Highway Design Services:

- Preliminary and Final Design
- Traffic Engineering Analysis and Design
- Noise Analysis and Mitigation
- Accident Analysis and Evaluation
- Drainage Analysis and Design
- Bicycle and Pedestrian Facilities
- Signing and Sign Structures
